

## Microsoft Access Solutions Customer Solution Case Study

### Overview

**Country or Region:** Global  
**Industry:** Food and Beverage

### Customer Profile

The Coca-Cola Company is an American multinational beverage corporation and manufacturer, retailer, and marketer of nonalcoholic beverage concentrates and syrups, which is headquartered in Atlanta, Georgia.

### Business Situation

As the demand for the company's product continue to grow, this site remained the singular source for the flavor manufacturing process and supply. It was necessary to find a scalable solution to their already outdated custom software.

### Solution

To accommodate The Coca-Cola Company's steady stream of growth, K.I.T. Corp updated their software to the latest Microsoft Access product. They also converted the custom software to use Microsoft Access as the front end and Microsoft SQL Server as a backend database.

### Benefits

- .. Increased access to data
- .. Increased data security
- .. Improved financial accountability
- .. Improved use productivity
- .. Seamless Integration

## Global Beverage Company Updates Their Custom ERP solution.

“We had an old version of 1997 Microsoft Access as a custom solution for running most of our financial and manufacturing processes. We needed a company that can update this program.”

Joseph Pickens, Plant Manager, The Coca-Cola Company

Located in Central Florida, the Coca-Cola Company has an established scientific laboratory for the purpose of delivering the flavor ingredient manufacturing process for their entire global operations. In the last 10 years, the small manufacturing plant with approximately 80 to 90 employees, has outpaced their desktop and server infrastructure and decided that they must upgrade to new technology.

The Coca-Cola Company decided to partner with K.I.T. Corp, a Microsoft Certified Business Partner, to implement the solution. K.I.T. Corp converted their older version of Microsoft Access to the latest version of Microsoft Access and SQL Server. They continued to support the custom software solution for over five years and created several integrated modules thereby increasing the solution's value. The Coca-Cola Company has benefited from this solution by keeping development costs low and increasing the lifespan of its custom software solution.
